PROFESSIONAL SUMMARY

Full Stack Developer with internship and project experience building frontend interfaces, backend APIs, analytics workflows, and real-time products using Go, JavaScript/TypeScript, React, Node.js, MongoDB, ClickHouse, Redis, Docker, and PostgreSQL. Comfortable across frontend development, backend systems, performance optimization, CI/CD, and end-to-end delivery for AI-powered and customer-facing applications.

TECHNICAL SKILLS

Languages: Go (Golang), JavaScript, TypeScript, Java, SQL

Frontend: React.js, Next.js, React Native, HTML, CSS, Tailwind CSS, Redux

Backend: Node.js, Express.js, NestJS, FastAPI, WebSockets, Prisma

Databases: MongoDB, PostgreSQL, ClickHouse, Redis

Tools: Docker, Git, GitHub Actions, CI/CD, Jest, PostHog, GCP Cloud Tasks

EXPERIENCE

Matrice AI - Full Stack Developer Intern | San Francisco, CA (Remote) | Jan 2026 - Present

Stack: Go (Golang), React.js, MongoDB, ClickHouse, Redis, Docker

- Built incident management workflows for AI camera deployments across 5 cameras, enabling users to review incidents, manage model behavior, and operate multi-camera systems from a unified interface.
- Developed no-code rule configuration, instant alerting under 5 seconds, and 2-3 ClickHouse-backed analytics dashboards with graph, table, and camera-group aggregation views for operational visibility.
- Partnered with the ML team to operationalize custom camera models and Vision Language Model related product flows across frontend and backend systems used for large enterprise customer deployments.
- Led backend and frontend redesign of 5 major product flows across App Store, Application, Version, and Demo experiences, and handled CI workflow migration plus 5-10 security fixes across services.

Hanabi Technologies - Full Stack Developer Intern | Remote, Bangalore | Feb 2025 - Jul 2025

Stack: React, React Native, NestJS, Node.js, Docker, MongoDB, Redis, Next.js

- Built the Task Module end to end, improving task throughput by 65% and adoption to 80% within 4 weeks.
- Shipped React Native features including Google Login and AI chat, improving conversion by about 22%.
- Reduced P95 API latency from about 1.8s to 600ms through algorithmic optimization, batching, and multi-layer caching.
- Migrated Agenda jobs to GCP Cloud Tasks, scaling to about 1,200 jobs per minute with about 90% fewer failed retries.
- Developed Jira and Google Drive memory connectors and contributed to RAG-based AI memory ingestion across text, CSV, and URL inputs.

WYB, Soulgenix Technologies Pvt. Ltd. - Software Engineer Intern | Bangalore, India | Jun 2024 - Sep 2024

- Delivered React mini-games that increased session time by 25% and day-7 retention by 18% through A/B-tested gameplay improvements.
- Optimized the frontend codebase to reduce load times and improve application responsiveness.
- Collaborated with backend, Flutter, Unity, design, and QA teams to deliver integrated user experiences.

PROJECTS

Portfolio Platform | Next.js, TypeScript, PostgreSQL, Redis, Prisma, Docker, Razorpay, PostHog, GitHub Actions

- Built a personal portfolio and hiring funnel with authentication, payments, hire requests, analytics, and automated email notifications.
- Improved reliability and performance through caching, background workers, webhook processing, rate limiting, batching, and database indexing; supports about 21 requests per day.

2D Multiverse | MERN, TurboRepo, Redis, TypeScript, WebSockets, Docker, Redux, PM2, GitHub Actions

- Built a real-time 2D collaborative playground with spaces, maps, elements, avatars, and live multi-user interaction.
- Structured the application as a Turbo monorepo and added caching, custom rate limiting, database optimization, clustering, and CI/CD automation.

EDUCATION

Punjabi University, Patiala - Bachelor of Technology in Computer Science and Engineering (B.Tech in CSE) | June 2026

ACHIEVEMENTS

- LeetCode rating 1931, top 3.44%, and solved 200+ problems.
- Codeforces Specialist with a maximum rating of 1436.
- Ranked 326 in Constructor Open Cup 2024 by Constructor University and JetBrains.
- Contributed to Hacktoberfest 2023 open source projects.
